sales@bettershredders.com

Leasing / Financing Options Available

Our Super Heavy Duty hard drive shredders are ideal for clients processing extremely high volumes. These machines are direct driven so there is no belt that can ever break and need to be replaced resulting in downtime and additional maintenance cost.

All of our SHD hard drive shredders are manufactured with a powder coated finish which offers greater durability and corrosion resistance than a traditional painted finish. Our cutters are manufactured from the same material jack hammer bits are, making them extremely durable and exceptionally long lasting.

SHD hard drive shredders will shred most computer hard disks, copier hard drives, laptop and notepad computers, reel-to-reel tapes, cell phones, circuit boards and assorted e-waste.
