sales@bettershredders.com

Leasing / Financing Options Available

SSD Solid State Drive Hammer Mills will shred SSD's, memory cards, thumb drives, circuit boards, and other solid state drive devices to 2mm, 4mm or 6mm particles depending on the model. This dual stage destruction system utilizes a 2 HP pre-shredder with 3/8" cutters that discharges into a 3 HP hammer mill. SSD Solid State Drive Hammer Mills shred up to forty SSD's an hour and include a sound absorbing lining that results in an 85-decibel noise level, on average. All models include a dual filtration HEPA cyclone dust collector and an infeed conveyor. SSD Solid State Drive Hammer Mills require three-phase power and are available in different screen sizes. Our solid state drive hammer mills can be stationary or placed in trucks for mobile solid state drive shredding.

SPECIFICATIONS	6mm-SSD
Power Requirements In Voltage	208, 230, 460 - 3 Phase
Hammer Mill HP	3
Pre-Shredder HP	2
Solid State Drives per Hour	40
Infeed Dimensions W/H (inches)	8.5"/1.5"
Size L/W/H in Inches	58/61/71
Weight (lbs)	3,700
