Leasing / Financing Options Available

Our degaussers will completely erase all data from hard drives and high coercivity tapes rendering them unusable.

It important to note that not all degaussers will erase hard drives. The field strength and the orientation of the degaussing field need to be able to penetrate the aluminum housing of the hard drive and be strong enough to reverse the polarity of the high coercivity magnetic particles on the disk platters.

Degaussing gives you in-house control of all sensitive and private information. Computers have been designed to be resilient. They allow information to be recovered if accidentally deleted or even if the hard drive has been reformatted. Even after deleting or reformatting the hard drive, magnetic patterns of existing data still exists on the disk platters. Degaussing demagnetizes the entire hard drive including the disk platters – leaving no magnetic patterns on the hard drive.

SPECIFICATIONS	TS-1
Power Supply	100V to 240V ±5%, 50/60 Hz -
Power Consumption	Under standby 0.5A While charging 3.5A < 1 second At the time of ERASE 0.5A
Degausser System	Capacitive Discharge
Duty Cycle	Continuous
Erasure Time	45 second repetitive cycle
Magnetic Field in Tesla	2.0
Certifications	NSA, CSS
Erasing Area Size	1.0 x 4.5 x 6.75
Media	Hard drives, tape cartridges including DLT, LTO, 3590 Series, 8mm and more.
Temperature	10°F - 112°F (-12°C - 45°C)
Humidity	10%H - 40%H (without)
Weight	144 lbs. (66 Kg) Shipping: 160 lbs. (73 Kg)
Size	21.5/17.5/19
Warranty	1 Year Factory Warranty Standard, Optional 3 Year Factory Warranty available.
