Leasing / Financing Options Available

The PD-5 Data Destroyer is capable of destroying hard drives as well as solid state media making it arguably the most versatile device of its kind. Features include an LCD display, a 9 second cycle for two standard hard drives and an optional SSD/Flash Media destruction insert (SSD-1). At 72 pounds, the PD-5's all aluminum chassis, motor and main components make it the lightest hard drive destroyer available and completely recyclable.

The PD-5 has been engineered with an automatic High-Torque Sensor that allows the crushing wedge to move at high speed to the media and then optimize speed for maximum crushing power. The PD-5 automatically destroys all formats and sizes of hard drives including Network SCSI and IDE Drives up to 1.66" in height. The PD-5 doesn't rely on software, therefore it will destroy, in just 9 seconds, all working and non-working hard drives put in the chamber. A simple push of a button will ensure complete hard drive destruction.

SPECIFICATIONS	PD-5
Power Supply	100-240V ±5%, 50 or 60 Hz - Standard
Power Consumption	1.5A Operating 7A MAX @ 120VAC
Crush Time	360 standard drives per hour
Destruction Capacity	One full height 1.66 inch hard drive Two standard 1 inch hard drives Eight laptop drives WITH Optional SSD-1--SSD's, Flash, Compact Flash, USB Thumb Drives and
Operating Environment	41°F - 104°F (5°C - 40°C), Humidity: 10 to 80% (non-condensing)
Weight	72 lbs.
Size	18/7/14.5
Notes	Hard Drives are not reusable after having been destroyed.
